Labor leaders are taking it for granted that the closed shop ban in the Taft-Hartley act is doomed. Officials of the Chamber of Commerce of the United States say this "seems likely."

By "closed union," he means a union that bars people from membership on grounds other than non-payment of reasonable dues or initiation fees.

Berlin Still Jokes About the Russians

Berlin —(P)— Berlin still jokes about the Russians. One story tells about a German who lived in a seaport. He used to go down to the harbor every day and just stand there for hours looking out to sea. People began to wonder about him. One day even the town's Russian commandant went down to ask what he was looking for so sadly.

Russian commandant went down to ask what he was looking for so sadly.

The German answered: "Why. I'm just waiting for the arrival of those grain ships which the Russians promised to send us from the Soviet Union." The Russian patted the German on the shoulder and replied gently in broken German: "Don't look for those ships here. Look in your newspapers." Another story tells of a Russian officer meeting a German nun praying by a roadside shrine. Said the Russian: "Why are you praying?" "So things will go well with me and we will have better times," replied the nun.

"Well. I never heard of that—that one can get rid of his cares and troubles through prayer. Say, why don't you say a prayer for me, too?" Next day he again found her at prayer. "Now what are you praying for?" he asked.

"I'm praying for you, asking that you'll be able to go to heaven," said the nun. Thereupon, the story goes, the Russian blurted out an astonished rejection: "No, no, I don't want to go to heaven. I want to stay in Germany."

(This story is intended to stress what many Germans have always contended: That the Russians stationed in Germany "never had it so good.")

Warsaw (P)— Polish chemical engineers claim they have found a way to make nylon stockings from peat. Two chemists employed in the coal industry institute at Biskupice are working on a method of extracting phenol from neat

The semi-official newspa "Rzeczpospolita" said "phenol an essential ingredient in the production of nylon. So far, phenol was obtained from hard coal but peat proved a much better raw material, having three times more phenol than hard coal."

Trucking to Freedom

This family hastily loads its belongings on a truck, as it prepares to flee into the western zone of Berlin from Stolpe, just turned over to the Russians by the French. Chicago Visions 20 Million People by 2048

Chicago —(IP)—Chicago will have a population of 20 million people and will be the world center of all television broadcasting in the year 2048, claim Chicago news experts and city planners. Their prediction was sealed in an atom-bomb proof "time-capsule" buried here at the site of Chicago's first depot by the Chicago and North Western Railway.

Burial of the capsule— which contains more than 500 photographs of railroading as it is today—marked the end of the first century of railroading in Chicago.

One radio commentator said he believed the Chicago of 2048 would be "vastly cleaner than it is now." Sherrill and Mrs. Vada Millard of Electrification through nuclear Pine Bluff. Under occupation rules the death sentence can be passed by a Garman man court but it must have the affirmation of the four occupying powers. This was relatively simple up to last July, when the Russians walked out and torpedoed the fourpower Alied Kommandatura.

BEWILDERED HUSBAND No Solution To Problem

Answer: The question of how much time a man should give to entertaining his wife is one of the problems to which there is no definite answer, because husbands and wives look at it from such a different standpoint. The great majority of wives are sold to the belief that their husbands' leisure belongs to them and that it should be spent in taking them stepping, or doing household chores, or being gay and amusing companion. The tired businessman, on the other hand, feels that after a bard day's work it is his privilege to pass into silence and rest his feet and his vocal cords.
